

Java

```
class Solution {  
    public int pivotInteger(int n) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number} n  
 * @return {number}  
 */  
var pivotInteger = function(n) {  
  
};
```

TypeScript

```
function pivotInteger(n: number): number {  
  
};
```

C++

```
class Solution {  
public:
```

```
    int pivotInteger(int n) {  
    }  
};  
-----
```

C#

```
public class Solution {  
    public int PivotInteger(int n) {  
    }  
}  
-----
```
